

## NOTICE TO ALL FEDERAL AND STATE GRANT RECIPIENTS REMEDIAL CLASS LIMITS

Federal and State regulations allow a total of 30 hours of remedial coursework for which a student can receive federal or state funding. Any remedial work (ENG 075, 085, 095, and MAT 060, 070, 080) taken beyond a student's 30 hour limit can not be included in enrollment totals to calculate the financial aid payment.

This means after you have taken a total of 30 hours of remedial coursework, your future financial aid payments may be reduced to reflect payment only for the hours of regular college courses for which you are taking each semester.

If you are unsure of the number of remedial hours you have attempted, please request a copy of your college transcript and count the credit hours for each of the remedial hour courses for which you have previously enrolled. You may also speak with your advisor concerning your need for remedial coursework and the number of hours of remedial work you have attempted in the past.

Please contact the Financial Aid office at 336-506-4109 for any questions you have concerning this matter.
